

Richard Aviles

Team #5

10/27/17

Individual Status Report #6

This week I met up with my team on Tuesday to discuss what we all wanted to do for the project. I attended my team meeting with Chinmay and my group and we decided to continue studying up on the google api and Android studios. I also worked on the video for the group presentation that is to be presented on Monday. I helped write in the material for the slideshow and with the overall development of the video.
