

Richard Aviles

Team 5

Individual Status Report

This was the first week we had a full team so there was not much to do individually. I continued to look up project ideas to pitch to the group since we still are not completely certain as to what we want our project to be. I also filled in my contact and availability for the group, made by Ashley, so that everyone else had my information. I also pitched my idea for the project and discussed meet up times with the group.
